

GZYME³

Concentrated Ultrasonic Cleaner

Triple enzyme, triple concentrate and triple surfactant make Gzyme³ the most effective and unique cleaner.

Gzyme³ is a unique bacteriostatic triple enzyme cleaner. The powerful formula quickly penetrates and removes blood, proteins, carbohydrates, mucopolysaccharides and lipids from all surgical instruments, flexible and rigid scopes, in as little as one minute.

Low foaming, neutral pH Gzyme³ is non-corrosive and compatible with most metals, plastics and rubbers. Gzyme³ contains powerful

chelating agents that form a barrier around instruments, protecting them from minerals naturally found in water that contribute to the build-up of film and binding of hinges.

The super concentrated formula comes in a convenient 1L self-dispensing twin-neck bottle and makes 400 liters of cleaning solution.

- Neutral pH
- Non-toxic, biodegradable
- Low foaming, free rinsing
- Triple surfactant blend
- Pleasant Tangerine Peel scent
- Super convenient, super concentrated
- Fast acting - cleans in as little as 1 minute
- Economical - 10 mL makes 4 L of use solution
- Improved performance in hard water conditions

The optimum cleaning choice!
